Sprint 2 Retrospective

Reflection on the Sprint

- What was the goal of this sprint?
 - The objective was to carry out all ESOF, MDISC, MATCP, PPROG and LAPR tasks efficiently, meeting the stipulated deadlines and with good team management.
- What were our successes?
 - We managed to deliver all requested tasks to work correctly and within the proposed period.
- What challenges did we encounter?
 - The fact that we don't all have the same number of classes.

Discussion and Feedback

- What did we learn from these challenges?
 - We learned that having different class times makes it hard to work together. It showed us we need to be flexible and talk well in group work.
- How did we overcome the challenges?
 - We fixed these problems by choosing meeting times that worked for everyone. We also used online tools to share updates and keep everyone involved.
- What can we do to prevent similar issues in the future?
 - For the future, we can plan our meetings to be more flexible from the start. Using a shared calendar to show when we are free will help us organize better and make sure everyone can join in.

Recognition and Team Building

- How did each team member contribute to this sprint?
 - The tasks were distributed equally, and each member was responsible for carrying out the task assigned to them.
- How have we supported each other this sprint?
 - During this sprint, the team always demonstrated its spirit of mutual assistance. When obstacles arose, there was no hesitation in sharing knowledge, ideas and resources to find the best solutions. This openness and generosity in mutual assistance facilitated the progress of the work and allowed each member to feel comfortable sharing any difficulties that arose.

Action Plan and Next Steps

- What specific steps will we take to implement the identified improvements?
 - We have to update existing information and correct possible errors in it.
- Who is responsible for each action item?
 - ESOF- US020 (1231205); US021 (1210527); US022 (1230684); US023 (1231502); US024 (1231205); US025 (1210527); US026 (1230684); US027 (1231502); US028 (1231205 and 1230684); US029 (1210527 and 1231502)
 - MDISC- US017 (1231804 and 1230684); US018 (1231804); US019 (1231205 and 1210527)
 - MATCP- US015 (1231205, 1210527 and 1231502); US016 (1230684 and 1210527)
- By when do we aim to complete these action items?
 - To the end of the Sprint C.

Final Thoughts

- What are we looking forward to in the next sprint?
 - Refinement of Previous User Stories
 - Documentation and Implementation of User Stories (US20 to US29)
 - Implement the program in Java Code and other KPIs in Python
 - Test and Quality insurance of the Software

What went well?

Things we are happy about.

Unit testing

- Code
- Completed all planned user stories on time.
- Supplementary Specification
- User Manual
- Interfaces

What went less well?

Things we should improve

SUGGESTED GROUP

Story grooming

- Analysis
- Communication
- Time
- Complete some tasks that depend in other tasks at time

What do we want to try next?

Things we should do differently.

Code review for anything non-trivial ☐ 1

- Communicate better
- Design

What puzzles us?

Unanswered questions we have.

Improving team spirit

- Difficulty in estimating the complexity of certain technical tasks.
